Râul Certej (30 October 1971) -

land slide of the mountain broked dam.

6 blocks were erased

89 people dead because of this landslide and 76 were hurted

300.000 m3 of steril covered the area

they could in power the dam and doesn't build the flats for the workers in that area so close to the dam

We suggested that they could build the buildings far away from the dam and scarp to avoid the catastrophe and save lives

Heavy rain on 14 July 2021 triggered flash floods and landslides in the Province of Rize in the Black Sea Region of northern Turkey . As of 15 July authorities in the province reported 6 people had died and 2 were missing. The districts of Muradiye, Güneysu and Çayeli were all badly affected. Houses collapse or were buried under landslides and flood debris. Over 70 roads in the area have been closed.

A team of 440 emergency workers carried out search, rescue and relief operations, involving boats and helicopters. Turkey's Ministry of Interior Disaster and Emergency Management (AFAD) said 2 bodies were recovered in Merkez in Muradiye, 1 in the town of Güneysu and 3 in the village of Ballıdere in Güneysu district.

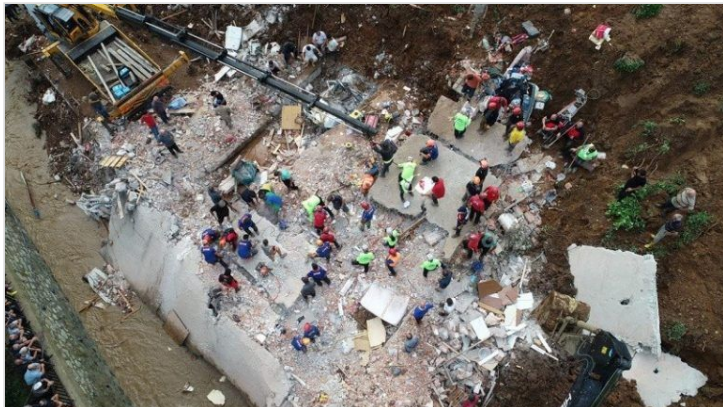

According to Turkey's meteorological agency Meteoroloji Genel Müdürlüğü (MGM) the town of Güneysu recorded 213.6 mm of rain in 24 hours to 15 July, while Çayeli recorded 188.3 mm.
